

Dear Investigators,
We are pleased to give you the latest news about the POSE Study!

Highlights

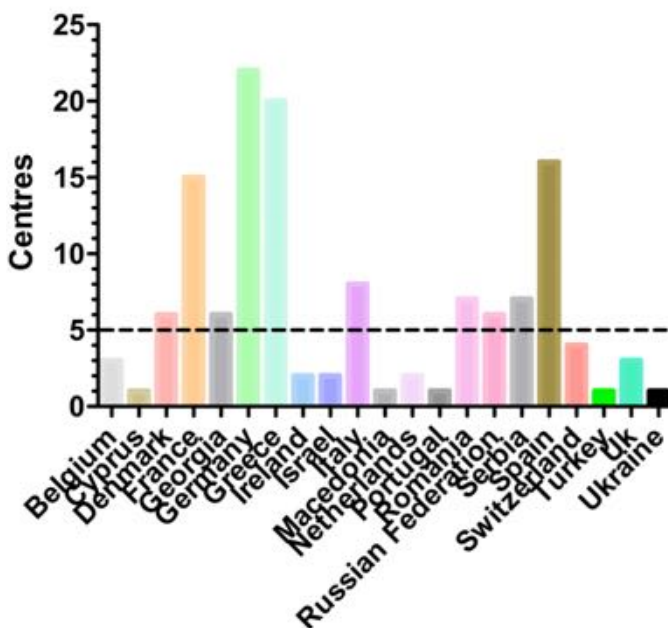

- 134 registered centres from 21 countries
- So far about 536 / 7500 patients were enrolled in 11 centres!
- We would like to congratulate our actual top-recruiting sites: Ludwigs-Maximilians University Hospital Munich (Germany) 138 patients and Cork University Hospital Group (Ireland) 83 patients!

Important notice:

1. It is of utmost importance to perform the 30 days follow-up for the success of our POSE-study. The peri-interventional all-cause **mortality rate until day 30** is our **primary endpoint!** If you cannot reach the patient on day 30, please try to contact his/her next of kin. If you do not reach anybody on day 30, please try again one day later! A guideline how to perform the telephone follow-up can be found on our website <http://www.pose-trail.org> > Study Documents > Guidelines

2. We are still recruiting more centres, please reach out for more possible centres.

Registered centres: 134 (05.12.2017)

POSE Website

- Please don't forget to download before patient enrolment, the important "other" documents (Task delegation form, screening list, patient log sheet and end of study reporting form), which you can find on our website under the Tab: **Study Documents => Other documents** (at the end of this page). These documents are important for study conduction as well as the end of your study participation.
- All participating persons, who are listed in the POSE Task delegation form by the Principle Investigator, will receive after submission of this document to us a **Participation Certificate** at the end of the study.

Best wishes
Mark Coburn (Study Director)

Ana Kowark (Study Coordinator)
