

Secondary Analysis guideline

Peri-interventional Outcome Study in the Elderly (POSE): European, multi-centre, prospective observational cohort study

Proposals for Secondary Analyses Document

Each Secondary Analysis using the complete or a portion of the POSE dataset needs to be approved by the Steering Committee of the POSE study. Please use the [Secondary analysis Proposal Document](#) to submit your proposal. The Steering Committee will review your proposal and submit you a decision. An overview of approved proposals will then be available on the POSE website.

Manuscript

The final manuscript of the Secondary Analysis must be reviewed and approved by the POSE Steering Committee before submission to a journal. The same applies for submission of abstracts for presentations at congresses or symposia.

Important note

Note that publications and or presentations of these Secondary Analyses and Sub-Studies are not allowed until the main POSE study manuscript is published!
